EDUCATION

2022-2026

KAMARAJ COLLEGE OF
ENGINEERING AND TECHNOLOGY

- Bachelor of Technology
- CGPA :8.0
- Honors in Product Development

2020 - 2022

KVS ENGLISH MEDIUM SCHOOL
[CBSE]

- SSLC : 79 %
- HSC : 76 %

SKILLS

- Java
- Figma
- React js
- Python
- Sql
- Critical Thinking
- Vibe Coding

LANGUAGES

- Tamil (Fluent)
- English (Fluent)
- Hindi (Intermediate)

BALAHARISH ALAIS YOGESH

OBJECTIVE

As a proactive team player, I thrive in collaborative environments and am committed to continuous learning and professional growth. I am eager to contribute user-centered solutions that drive company success and enhance operational efficiency. With a passion for problem-solving and a focus on delivering impactful results, I am ready to support and elevate the organization's growth.

PROJECTS

- **InsiderWatch- AI Based Insider Threat Detection System**
Using Python , AI ML , TypeScript **[Published]**
 - Engineered an AI-powered insider threat detection platform using Python, FastAPI, React, and Machine Learning.
 - Implemented real-time monitoring of employee activities through USB tracking and browser behavior analysis.
 - Developed a hybrid anomaly detection engine using Isolation Forest and Random Forest algorithms.
 - Designed interactive dashboards for risk scoring, threat alerts, analytics, and security reporting
- **AttendifyX-Smart AttendanceSystem using Deeplearning**
Using Python , InsightFace , TypeScript **[Published]**
 - Engineered an AI-driven attendance system using InsightFace , React, TypeScript and Node.js.
 - Implemented real-time face recognition with scalable, secure backend services.
 - Designed modern dashboards with automated analytics and reporting features.
- **F.R.I.D.A.Y - An Elite AI -Voice Assistant**
 - Developed "F.R.I.D.A.Y" an AI-powered voice assistant in Python using LiveKit agents and Google LLM, integrating natural language processing with fallback conversational capabilities, demonstrating expertise in real-time AI agents and cross-platform automation.
- **IPL Mock Auction Simulator with AI Franchise Engine**
Using React.js, Node.js, Socket.IO, PostgreSQL
 - Developed a real-time IPL auction platform with multiplayer rooms, live bidding, automated auction workflows, and responsive mobile-first interfaces.
 - Engineered a mathematical AI franchise engine that evaluates player roles, squad balance, budget constraints, capped players, and overseas limits to simulate realistic auction strategies and team-building decisions.

MINI PROJECTS

- Medicine based Chatbot - Remedies (INTERNSHIP)
- Heart disease prediction using ML
- Ticket booking system using Java and DBMS
- Muscle Factory - Fitness Web Platform
- EliteCart - Ecommerce Website

ACHIEVEMENTS

- Authored and published a research journal titled "Attendifyx: Smart Attendance System Using Deep Learning" in the International Research Journal on Advanced Science Hub (IRJASH).
- Presented and published a journal titled "Quantum Computing in Drug Discovery" at the Second International Conference on Futuristic Trends in Science, Engineering, and Management, Patna.
- Presented InsiderWatch - AI based Threat detection System at IMSTEM 2026.
- Have completed an International certification course by Oracle, titled "Oracle Java Certified Foundation Associate", with a score of 88%.
- Completed Value added Course in DataScience using Python,IOT.
